

HUMANITARIAN MISSION

NEPAL

A TIME TO STAND TOGETHER

THERE IS A COUNTRY WHERE THE MOUNTAINS TOUCH THE SKY.

Nepal is a small nation between India and China. It is home to eight of the planet's fourteen 8,000-meter peaks: Everest, Kangchenjunga, Lhotse, Makalu, Cho Oyu, Dhaulagiri, Manaslu and Annapurna. Every year, more than a million travelers arrive from all over the world. Some follow legendary trails to base camps. Others spend months preparing to climb, hoping one day to stand on the highest point on Earth. Still others come for the silence of Kathmandu's ancient temples and of monasteries lost in the clouds.

But Nepal captivates with more than its heights. It captivates with its people — open, welcoming, resilient. People who have lived for centuries alongside the grandeur and harshness of the Himalayas.

NEPAL WILL NEVER FORGET THE MORNING OF AUGUST 26, 2026.

At 8:37 a.m., a glacier suddenly collapsed on the slopes of Langtang Lirung in the Himalayas.

DEBRIS FLOW IN THE TRISHULI VALLEY

The avalanche of ice and rock became a monstrous debris flow. Within seven minutes it had wiped out the border crossing with China, then tore nearly a hundred kilometers down the Bhote Koshi and Trishuli valleys. Syabrubesi, Dhunche, Betrawati and Trishuli were buried under water and mud. **More than 1,400 people died; over 5,000 are still listed as missing.** The river carried victims' bodies up to 240 kilometers downstream, all the way to India. More than 8,000 homes were destroyed, along with 33 road bridges, 68 suspension bridges and nearly 70 kilometers of road. Entire villages were cut off for weeks, reachable only by air. More than a hundred children were orphaned. The disaster touched 1.6 million people, and recovery will take years.

THE SCALE OF THE DISASTER

BEHIND EVERY NUMBER ARE FAMILIES, HOMES AND ENTIRE TOWNS

1,400+

lives lost

5,000+

people missing

8,000+

homes destroyed

101

bridges: 33 road and 68 suspension

NATURE CANNOT BE STOPPED. BUT WE CAN
STAND WITH THOSE WHO SURVIVED IT.

STANDING TOGETHER

MIRA Safety is an American company founded with a single purpose: to protect people from the worst threats imaginable. But its mission has always reached beyond manufacturing. MIRA Safety does not stand aside when one community's misfortune becomes everyone's. Especially when the blow comes from nature — a force no one can predict or stop, yet whose consequences are felt by all of humanity.

It is with this mission that the MIRA Safety team is coming to Nepal. The lives lost cannot be brought back, and recovery will take years. But standing beside those who survived, supporting them and easing their burden, even a little, is something we can and must do today.

BECAUSE FOR MIRA SAFETY, PROTECTING PEOPLE
IS NOT JUST A PROFESSION. IT IS A RESPONSIBILITY.
